EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Own production microservices and REST APIs end-to-end, architecture through deployment, monitoring, and on-call, handling millions of daily transactions at 99%+ uptime.
- Built a multi-agent system via OpenAI Agents SDK with rule-based and ML-driven validation logic for production tool-use decisions.
- Engineered a pluggable distributed executor routing workloads across Docker and AWS Lambda with an S3 artifact store, eliminating redundant recomputation at scale.
- Participated in design and code reviews setting coding standards and testability bar, mentoring engineers on distributed-systems design patterns.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built a model observability framework tracking drift, latency, and eval regressions across a high-availability production service.
- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests by migrating synchronous serving to an async, horizontally-scaled architecture.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Cut nightly financial data aggregation blocking downstream settlement from 8 minutes to 90 seconds by redesigning SQL with indexed views and batch partitioning over billions of records.
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack platform with FastAPI backend, React/TypeScript dashboard, and PostgreSQL, exposing REST APIs for rubric-based scoring and latency tracking at scale.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, Python, C++, TypeScript, SQL

Distributed Systems: Microservices, REST APIs, High-Availability Design, Consensus Protocols, Fault Tolerance

Data & ML: PostgreSQL, SQL/Relational Databases, NoSQL, ML/Rule-Based Validation Systems

Cloud & DevOps: AWS (EC2, S3, RDS, SQS, Lambda), GCP (Cloud Run), Docker, Kubernetes, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
