Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Designed and built a deployment-gated release pipeline enforcing automated security, compliance, and quality checks before every release, blocking 15% of releases that failed validation criteria from reaching production.
- Built reusable CI/CD tooling and automation adopted across teams to support fast, reliable shipping of new code to staged validation environments and production, with observability via Prometheus and Grafana.
- Monitored production releases and diagnosed/resolved issues expeditiously by addressing root causes; mentored engineers on the team, keeping the system at 99%+ uptime and sub-200ms latency.

QureAI

Jan 2024 – May 2025

ML Infrastructure Engineer

- Led migration of a synchronous service to an async, autoscaled deployment architecture, cutting p99 latency 420ms to 140ms across 50K+ daily requests without compromising release safety.
- Built a production observability framework tracking latency, drift, and regressions across releases, using operational metrics to identify bottlenecks and prioritize fixes.

Nomura Research Institute Financial Technologies

Aug 2020 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and Java microservices in a distributed, fault-tolerant system for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly batch processing, cutting runtime from 8 minutes to 90 seconds via indexed views and batch partitioning, improving delivery speed without compromising correctness.
- Led standardization of failure-handling contracts across 25+ services in partnership with cross-functional teams, coaching engineers through code reviews and reducing production escalations 60% in one quarter.

Projects

Distributed KV Store / VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a Raft-consensus key-value store in-house with leader election, log replication, and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement for fault-tolerant distributed coordination.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- Multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports, addressing failures at the source rather than symptoms.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, Go, Java, C++, SQL

Build & Deploy: CI/CD, Release Pipelines, Deployment Safety/Rollback Gating, Terraform, Docker, Kubernetes, Git

Observability: Prometheus, Grafana, Drift/Regression Detection, Root-Cause Debugging, Autoscaling

Cloud & Infra: AWS (EC2, Lambda, S3, DynamoDB, API Gateway), GCP (Cloud Run), Distributed Systems, High Availability

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
