EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Engineered a pluggable distributed executor routing pipeline nodes across Docker and AWS Lambda, backed by an S3 artifact store eliminating redundant recomputation.
- Owned full-stack delivery of backend services and APIs (Python/FastAPI, React/TypeScript), integrating ML models into production workflows handling millions of daily transactions at 99%+ uptime.
- Designed stateful recovery via Redis checkpointing so interrupted workflows resume deterministically from the last committed step across distributed execution boundaries.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut p99 service latency 420ms to 140ms across 50K+ daily requests by migrating synchronous serving to async vLLM on GCP Cloud Run with autoscaling.
- Built a Cassandra-backed metrics ingestion system processing high-throughput time-series data for real-time monitoring and alerting.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, addressing concurrency, consistency, and sharding, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS, DynamoDB).
- Designed public-facing REST and gRPC APIs with CLI tooling, prioritizing backward compatibility and usability for partner integrations.
- Cut nightly financial data aggregation blocking downstream settlement from 8 minutes to 90 seconds by redesigning SQL with indexed views and batch partitioning.
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production LLM eval and observability platform with rubric-based scoring, drift detection, and latency tracking across model versions; FastAPI backend, React/TypeScript dashboard, PostgreSQL.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, Python, C++, TypeScript, JavaScript, SQL

Backend & APIs: Spring Boot, FastAPI, REST/gRPC APIs, Microservices, Data Structures and Algorithms

Databases: PostgreSQL, Cassandra, DynamoDB, NoSQL, BigQuery

Testing & Quality: JUnit, Mockito, Unit & Integration Testing

Cloud & DevOps: AWS (EC2, S3, Lambda, SQS), GCP (Cloud Run), Docker, Kubernetes, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
