Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Use Claude Code and Codex daily for AI-assisted code review, refactoring, and test generation, accelerating release readiness and code optimization across the platform.
- Build multi-agent workflows (LangGraph, CrewAI, AutoGen, OpenAI Agents SDK) automating incident triage and root-cause analysis as part of AI-driven SDLC automation.
- Design and maintain CI/CD pipelines, testing automation, and containerized deployment (Docker, Kubernetes) across the platform.
- Built a deployment-gated evaluation framework with guardrails, alerting, and observability, blocking 15% of failed releases before production.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built custom evaluators for RAG/agent workflows tracking drift, latency, and regression across model versions, catching failures before they reached production.
- Improved semantic retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval and re-ranking.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected 25+ production Java Spring Boot microservices exposing REST APIs, serving 1M+ users at 99.9% uptime on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ distributed services, reducing production escalations 60% in one quarter.
- Drove a redesign of nightly data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards.

Projects

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating incident triage and root-cause analysis; routes alerts to specialized sub-agents and synthesizes evidence-backed reports, reducing mean time to resolution.

Distributed KV Store & VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a distributed key-value store in Go/C++ implementing Raft consensus, linearizable reads, and log compaction; simulated VPC control-plane semantics for network partition and leader-election testing.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production evaluation platform with drift tracking, rubric-based scoring, and regression alerting across service versions; FastAPI backend, PostgreSQL.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Java, Python, TypeScript, SQL, C++, Go

AI-Assisted Engineering: Claude Code, Codex, LangGraph, CrewAI, AutoGen, Code Review/Test Generation

Backend & Data: Spring Boot, REST APIs, Kafka, NoSQL, PostgreSQL, Redis

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Monitoring/Alerting

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
