Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Designed and implemented AWS-based data architecture using S3-backed storage and Lambda-driven transformation, integrating multiple source systems into a unified pipeline for downstream analytics.
- Built and maintained Airflow DAGs orchestrating multi-stage data ingestion and transformation pipelines on AWS, enabling scheduled ETL workflows with dependency management and automated failure alerting.
- Built observability and automated alerting for pipeline health using Prometheus and Grafana, and shipped internal developer tooling that accelerates data discovery and analysis across teams.

QureAI

Jan 2024 – May 2025

ML Infrastructure Engineer

- Owned the data pipeline feeding production model evaluation end-to-end: sourcing, transformation, and quality control on a 2K-query eval set, lifting retrieval recall 61% to 89% via improved data curation.
- Built a production observability framework tracking data quality, latency, and regressions across pipeline versions to keep large-scale systems reliable at 50K+ daily requests.

Nomura Research Institute Financial Technologies

Aug 2020 – Aug 2023

Software Engineer

- Designed high-throughput SQL data pipelines for financial data ingestion and aggregation, cutting batch processing from 8 minutes to 90 seconds via indexed views, partitioning, and lock contention elimination.
- Architected and operated 25+ production Java microservices sourcing, transforming, and serving data for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS) with relational and NoSQL data stores.
- Delivered metrics dashboards and technical documentation translating pipeline health into actionable insights for cross-functional stakeholders, reducing production escalations 60% in one quarter.

Projects

Distributed KV Store / VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a Raft-consensus key-value store in-house with leader election, log replication, and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement for fault-tolerant distributed coordination.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production performance and eval tooling with rubric-based scoring, drift detection, and per-call latency benchmarking across model versions; FastAPI backend, PostgreSQL.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, SQL, Java, Go

Data Engineering: Airflow, ETL Pipelines, Data Architecture, Data Modeling, Data Quality & Validation, Query Optimization

AWS: S3, Lambda, EC2, DynamoDB, SQS, API Gateway

Databases & Ops: PostgreSQL, DynamoDB, MongoDB, Docker, CI/CD, Prometheus, Grafana

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
