EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned full-stack delivery of backend services and APIs (Python/FastAPI, React/TypeScript) integrated into large-scale cloud services handling millions of daily transactions at 99%+ uptime.
- Built a multi-agent GenAI system via OpenAI Agents SDK and MCP tool-use, integrating AI/ML-enabled capabilities into production workflows at scale.
- Ran A/B tests to validate product and model changes before full rollout, using experimentation results to inform release decisions and improve product health.
- Replaced polling with SSE for live metrics streaming and built observability into deployment workflows, cutting redundant API calls 90% and improving reliability monitoring.
- Deployed a production service on AWS for real-time decision support at sub-200ms p99 latency with RTO under 2 minutes.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut p99 service latency 420ms to 140ms across 50K+ daily requests by migrating synchronous serving to async vLLM on GCP Cloud Run with autoscaling.
- Built PySpark data processing pipelines for large-scale, data-intensive feature preparation feeding downstream training and evaluation.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Cut nightly financial data aggregation blocking downstream settlement from 8 minutes to 90 seconds by redesigning SQL with indexed views and batch partitioning.
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.
- Designed public-facing REST and gRPC APIs with CLI tooling, prioritizing backward compatibility and usability for partner integrations.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production LLM eval and observability platform with rubric-based scoring, drift detection, and latency tracking across model versions; FastAPI backend, React/TypeScript dashboard, PostgreSQL.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, Java, C++, TypeScript, JavaScript, SQL

AI/ML: LLMs, RAG, PyTorch, A/B Testing, Model Evaluation, MCP, LangGraph

Distributed Systems & Data: Distributed Systems, Service-Oriented Architecture, REST/gRPC APIs, PostgreSQL, Redis, BigQuery, NoSQL

Reliability & Observability: Observability, SLOs, Incident Response, CI/CD

Cloud & DevOps: AWS (EC2, S3, SageMaker, Lambda), GCP (Cloud Run, Vertex AI), Docker, Kubernetes

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
