EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Wrote infrastructure-level code in Go, Rust, and C++ for scheduling, resource allocation, and fault-tolerant placement logic on a multi-cloud (AWS, GCP, CoreWeave) Kubernetes-based GPU fleet under capacity constraints.
- Provisioned and managed cloud infrastructure declaratively with Terraform across multi-cloud environments, maintaining reusable modules and environment promotion for Docker/Kubernetes-based deployments.
- Adopted enterprise AI-assisted engineering practices (agentic coding workflows, OpenAI Agents SDK, MCP tool-use) into the daily SDLC, validating AI-generated code for correctness, performance, and security before merge.
- Maintained multi-stage CI/CD pipelines with automated quality gates and rollback, blocking 15% of failed releases before production, and instrumented services via Prometheus/Grafana for actionable alerting.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Operated multi-cloud GPU infrastructure (AWS, GCP, CoreWeave) with Docker/Kubernetes-based scheduling, writing Go and Python tooling for fault-tolerant placement under node loss and provider hiccups.
- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests through a systems-level async redesign and performance tuning.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated 25+ production Java/C++ microservices for financial investment workflows serving 1M+ users at 99.9% uptime over 4 years on AWS (EC2, RDS, SQS), in a regulated financial services environment.
- Standardized REST API failure-handling contracts across 25+ microservices, reducing production escalations 60% via consistent retry, timeout, and security-aligned authentication patterns; led architecture decisions and code reviews.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed storage engine in C++ handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing across nodes.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production observability platform tracking drift, latency, and regression alerting across deployments; FastAPI backend, PostgreSQL, Docker-based deployment with CI/CD.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Go, Python, Java, C++, SQL

Cloud-Native & Infra: Kubernetes, Docker, Terraform, AWS, GCP, Multi-Cloud Fleet Operations, CI/CD (GitHub Actions)

Reliability & Observability: Distributed Systems, Fault-Tolerant Placement, Prometheus, Grafana

AI-Assisted Engineering: OpenAI Agents SDK, MCP, Agentic Coding Workflows, AI Output Validation

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
