Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions, gating releases with **regression suites**.
- Implemented **GraphRAG** in production, improving LLM grounding and accuracy over standard vector **RAG** on complex multi-hop questions.
- Developed and deployed **deep learning models** in **PyTorch** and **TensorFlow** with automated training workflows and **MLOps CI/CD** on **AWS SageMaker**.

QureAI | *ML Infrastructure Engineer* Mar 2026 – Present

- Developed **PyTorch** deep learning models for **medical imaging** analysis and the **clinical data** workflows around them.
- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Built an **SRE incident agent** that escalates to a SQL agent over **A2A**, plus a **JIRA** Q&A agent, with **Langfuse** tracing and Claude-based tool calling in production.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

Projects

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

LangFetch `tinyurl.com/LangFetch`

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Python, TypeScript, SQL, Java

AI Systems: LLM Agents, Agent Harnesses, MCP, RAG, GraphRAG, Evals, OpenAI Agents SDK, LangGraph, Claude, Gemini

Vision & ML: Computer Vision, Medical Imaging, PyTorch, TensorFlow, scikit-learn, Hugging Face

Tools: Claude Code, Codex, FastAPI, PostgreSQL, Pinecone, Neo4j, Docker, AWS, GCP

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
