EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Use AI coding assistants (Claude Code, Codex) daily for design, implementation, code review, and testing, breaking problems down and iterating with AI to reach production-quality solutions.
- Built GPU/HPC cluster infrastructure in Go and C++ with CUDA, scheduling jobs across Slurm and InfiniBand-networked nodes.
- Built a multi-agent system with the OpenAI Agents SDK and MCP tool-use for production workflows, handling millions of daily transactions at 99%+ uptime.
- Built a pluggable distributed executor for scalable data-pipeline workflows, routing jobs across Docker and AWS Lambda with an S3 artifact store.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built evaluation frameworks to measure the performance of large language models in production, tracking drift, latency, and eval regressions to gate rollback decisions.
- Fine-tuned and analyzed pretrained models on domain-specific datasets, improving retrieval recall from 61% to 89% on a 2K-query eval set through hybrid dense-sparse search and re-ranking.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

LLaMA 2 Fine-Tuning Pipeline for Financial Documents

github.com/ganeshhgupta/llama2-finance-finetuning

- Post-trained a pretrained LLM with LoRA and PEFT for domain-specific document understanding, running systematic hyperparameter experiments on capacity-performance tradeoffs.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Built an LLM evaluation and observability platform (Python, FastAPI, React/TypeScript, PostgreSQL) with rubric-based scoring and drift detection across model versions.

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Built a Raft-consensus distributed storage engine in C++, implementing log compaction and linearizable reads under concurrent writes for scalable distributed workflows.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, C++, Go, TypeScript, JavaScript, Java, SQL

AI-Assisted Development: Claude Code, Codex, Prompt Engineering, Agentic Coding Workflows

AI/ML: LLMs, LoRA/PEFT Fine-Tuning, RAG, Evaluation Frameworks, Agentic AI, OpenAI Agents SDK, MCP

Systems: Distributed Systems, CUDA, Consensus Algorithms, Scalable Data Pipelines

Cloud & DevOps: AWS (EC2, S3, SageMaker), GCP (Cloud Run), Docker, Kubernetes, CI/CD, PostgreSQL

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
