Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Own multi-step agent workflows (LangGraph, CrewAI, AutoGen, OpenAI Agents SDK), building reusable MCP-compatible components adopted across product teams.
- Build backend services and REST APIs in Python, owning CI/CD pipelines, containerized deployment (Docker, Kubernetes), and Terraform infrastructure as code on AWS.
- Built a deployment-gated evaluation framework enforcing guardrails and observability, blocking 15% of failed releases before production.
- Combine GraphRAG with vector-based RAG for grounded retrieval, designing REST APIs that let teams build and launch features safely end-to-end.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built PySpark data processing jobs for large-scale ingestion and transformation feeding downstream model training and evaluation pipelines.
- Built custom evaluators for RAG/agent workflows tracking drift, latency, and regression across model versions.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected 25+ production Java Spring Boot microservices exposing REST APIs, serving 1M+ users at 99.9% uptime on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ distributed services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards.

Projects

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- Multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

LangFetch | tinyurl.com/LangFetch

- LangGraph agent with MCP-compatible tool-use compiling natural-language questions into dependency-ordered SQL subqueries with vector retrieval and hybrid re-ranking; deployed as a reusable MCP server.

Distributed KV Store & VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a distributed key-value store in Go/C++ implementing Raft consensus, linearizable reads, and log compaction for fault-tolerant data systems.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, Java, Go, SQL, C++

AI Agents & RAG: LangGraph, OpenAI Agents SDK, MCP, RAG

Cloud & DevOps: AWS (EC2, RDS, SQS), Docker, Kubernetes, Terraform, CI/CD

Distributed Systems: Microservices, REST APIs, Raft Consensus, System Design

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
