Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Combine GraphRAG with vector-based RAG for grounded retrieval, designing REST APIs and distributed backend services in Python and Java.
- Own multi-step agent workflows (LangGraph, CrewAI, AutoGen, OpenAI Agents SDK) as part of an AI-native, agentic development workflow.
- Build the evaluation, guardrails, and observability layer deciding release safety, blocking 15% of failed releases before rollout.
- Build full-stack platform capabilities (React/TypeScript frontend, Python/FastAPI backend) used across product teams.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Improved semantic retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval and re-ranking.
- Built custom evaluators tracking drift, latency, and regression across model versions, providing the trusted signal to roll changes forward or back with confidence.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and Java microservices for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ distributed services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards.

Projects

Distributed KV Store & VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a distributed key-value store in Go/C++ implementing Raft consensus, linearizable reads, and log compaction; simulated VPC control-plane semantics for network partition and leader-election testing.

LangFetch | tinyurl.com/LangFetch

- Full-stack app with TypeScript/Node.js backend, React dashboard, and PostgreSQL; agent decomposes natural-language questions into dependency-ordered SQL subqueries via typed REST API.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- Multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, Java, Go, C++, SQL

Systems & Design: Distributed Systems, REST APIs, System Design, Raft Consensus

Cloud & DevOps: AWS (EC2, RDS, SQS), GCP, Docker, Kubernetes, CI/CD

AI & RAG: LangGraph, RAG, LLM Evaluation, MCP

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
