EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Architected scalable platform APIs and distributed services handling millions of daily transactions at 99%+ uptime, establishing ownership over components with expert end-to-end understanding.
- Built a multi-agent system via OpenAI Agents SDK and MCP tool-use, integrating AI tools to redesign engineering workflows and drive measurable efficiency gains.
- Built a deployment-gated evaluation framework enforcing guardrails and quality/regression checks across model outputs, blocking 15% of failed releases before production.
- Identified and resolved performance and scalability issues, cutting redundant API calls 90% by replacing polling with SSE for live metrics streaming.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Developed multi-modal computer vision models (PyTorch) for medical image understanding, running model training and fine-tuning on multi-GPU clusters with compression and quantization.
- Improved semantic retrieval recall 61% to 89% on a 2K-query eval set through systematic experimentation with hybrid dense-sparse retrieval and re-ranking.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production ML eval platform with rubric-based scoring, drift detection, and regression alerting across model versions; FastAPI backend, React/TypeScript dashboard, PostgreSQL.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; a from-scratch study of data structures, algorithms, and distributed-systems tradeoffs.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, Java, TypeScript, C++, SQL

ML: PyTorch, LLMs, Computer Vision, Model Evaluation, Data Structures & Algorithms

AI Tooling: Agentic AI, AI-Assisted Development, Prompt/Context Engineering, Agent Orchestration

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, CI/CD, PostgreSQL

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
