## EXPERIENCE

---

### QureAI | ML Infrastructure Engineer

Mar 2026 – Present

- Owned a production **retrieval and ranking** system end-to-end: raised **top-3 recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Built **PySpark** data-processing jobs for large-scale feature and dataset preparation feeding downstream **model training** and evaluation pipelines.
- Rebuilt synchronous model serving into an **async, autoscaled** architecture on **GCP Cloud Run**, cutting **p99 latency from 420ms to 140ms** across **50K+ daily requests**, operating it reliably on-call.
- Designed a **Neo4j** knowledge graph for graph-aware retrieval, root-causing and resolving a significant production regression in the retrieval path.

### Oracle | Software Engineer, AI Platform

Jun 2025 – Present

- Wrote fault-tolerant **Go/Rust** scheduling and resource-allocation logic for a multi-cloud **GPU fleet**, managing **NVIDIA GPU clusters** running training and inference at scale with **Slurm**-based scheduling.
- Used **AI code-development tools (Claude Code, Codex)** across design, implementation, and review, mentoring one engineer onto the workflow and validating generated code against correctness bars.
- Built a deployment-gated **evaluation framework** with **guardrails** and automated regression testing, driving a measurable reduction in failed releases.

### Nomura Research Institute Financial Technologies | Software Engineer

Sep 2019 – Aug 2023

- Architected **25+ production Java/Python microservices** for **1M+ users** at **99.9% uptime** over 4 years, independently debugging and resolving production regressions.
- Mentored engineers on system design and reliability while standardizing API contracts, cutting production escalations **60%** in one quarter.

## PROJECTS

---

### Distributed KV Store

[github.com/ganeshhgupta/Distributed-KV-Store](https://github.com/ganeshhgupta/Distributed-KV-Store)

- Built a replicated key-value store in **Go** implementing **Raft consensus** and **linearizable reads**, tolerating node failures without data loss.

### RootCause AI

[github.com/ganeshhgupta/rootcause-ai](https://github.com/ganeshhgupta/rootcause-ai)

- LangGraph** multi-agent system diagnosing production incidents via **tool-use** chains and specialized sub-agents.

### Watch-your-LLM

[github.com/ganeshhgupta/watch-your-llm](https://github.com/ganeshhgupta/watch-your-llm)

- Self-hosted **LLM** observability platform with **hallucination scoring**, a **FastAPI** collector, and a **React** dashboard.

## EDUCATION

---

University of Texas at Arlington | M.S. Computer Science, GPA 4.0/4.0

Aug 2023 – May 2025

MCKV Institute of Engineering | B.Tech Computer Science

Aug 2016 – Jul 2020

## SKILLS

---

**Languages:** Python, Java, Go, TypeScript, SQL

**ML & Retrieval:** PyTorch, PySpark, Hybrid Dense-Sparse Retrieval, Re-Ranking, Fine-Tuning

**AI Systems:** LangGraph, LangChain, RAG, Evaluation Frameworks, AI-Assisted Development (Claude Code, Codex)

**Cloud & Infra:** AWS, GCP, Azure, Docker, Slurm-based HPC Scheduling, CI/CD

**Certifications:** AWS Certified Developer Associate, GCP Professional MLOps Engineer
