EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Led a production **agentic system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that plans multi-step tasks, calls tools, and adapts to retrieved evidence across **millions of daily transactions** at **99%+ uptime**.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions, gating releases with **regression suites**.
- Implemented **GraphRAG** in production, improving LLM grounding and accuracy over standard vector **RAG** on complex multi-hop questions.
- Ran **A/B tests** on agent and model changes in production before full rollout, pairing them with **deployment-gated evals** to decide releases on measured impact.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Raised **top-3 retrieval recall** from **61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Designed a **Neo4j knowledge graph** of clinical domain entities and relationships, deployed to production for graph-aware retrieval in a **regulated healthcare** product.
- Cut **p99 latency** from **420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **SQL and PL/SQL** on a financial RDBMS with indexed views and partitioning.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Python, TypeScript, Java, SQL

Agents & Search: MCP, Tool Calling, LangGraph, OpenAI Agents SDK, Hybrid Dense-Sparse Retrieval, Re-ranking, GraphRAG, Elasticsearch, Pinecone, FAISS

Evals & ML: Eval Datasets, Benchmarks, Regression Suites, A/B Testing, Fine-Tuning, PyTorch, Hugging Face

Infra & Tools: AWS, GCP, PySpark, Airflow, Docker, Kubernetes, CI/CD, Claude Code, Codex

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
