Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Built a multi-agent system in Python and TypeScript using the OpenAI Agents SDK, LangGraph, and MCP tool-calling, designing SDK-style APIs and tool interfaces for autonomous, multi-step agent workflows at 99%+ uptime.
- Owned solution design and complex production troubleshooting for the agentic AI platform end-to-end, moving fast from architecture through deployment alongside product stakeholders with real ownership.
- Built and operated AWS infrastructure (Lambda, DynamoDB, SageMaker) backing real-time agentic API calls at sub-200ms latency, engineered for reliability under production load.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Joined as an early engineer at this AI startup and owned production infrastructure end-to-end, migrating model serving to async vLLM and cutting p99 latency 420ms to 140ms across 50K+ daily requests.
- Improved RAG retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval, operating with high autonomy in a small, fast-moving team.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and SQL-backed microservices in distributed systems for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Led standardization of failure-handling contracts (retry, timeout, propagation semantics) across 25+ services in partnership with cross-functional teams through code reviews, reducing production escalations 60% in one quarter.

Projects

LangFetch | tinyurl.com/LangFetch

- LangGraph agent with Pinecone vector retrieval decomposes natural-language questions into dependency-ordered SQL subqueries over PostgreSQL; deployed as an MCP-compatible API server for enterprise data queries.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports, reducing mean time to resolution.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: TypeScript, Python, SQL, Java, C++

APIs & Agents: Agentic AI, API Design, SDK Design, MCP, LangGraph, OpenAI Agents SDK, Tool/Function Calling, RAG

Full-Stack & Data: React, Node.js, FastAPI, REST APIs, PostgreSQL, Microservices, Distributed Systems

Cloud & DevOps: AWS (Lambda, EC2, RDS, SQS, SageMaker), Docker, Kubernetes, CI/CD, Git

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
