Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Use **Claude Code** and **Codex** daily in AI-assisted development, and build **agent workflows** across GPT, Claude, Llama, and Gemini with **MCP** tool use.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions, gating releases with **regression suites**.
- Wrote **Go, Rust, and C++** systems code for **scheduling**, resource allocation, and **fault-tolerant placement** on multi-cloud **GPU clusters** running on **Kubernetes** and **Slurm**.
- Shipped production services end to end through **GitHub Actions CI/CD** with **Docker** deployments and **SSE-based observability**, cutting redundant API calls **90%**.

QureAI | *AI Engineer* Mar 2026 – Present

- Built an **RCA incident agent** that escalates to a **SQL agent over A2A**, plus a **JIRA Q&A agent**, with **Langfuse** tracing and evaluation on production runs.
- Rebuilt the incident agent on the **Claude Agent SDK**, shipped through automated deploys.
- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.
- Cut model-related production regressions **28%** and validation time from **6 hours to 90 minutes** with an automated **evaluation and deployment-gating** framework.

Projects

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

Distributed KV Store `github.com/ganeshhgupta/distributed-kv-store`

- **Raft**-consensus key-value store with **linearizable reads** and **log compaction**, plus a companion VPC control plane simulator.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Python, Go, Rust, C++, TypeScript, SQL

AI Dev Tools & Agents: Claude Code, Codex, Claude Agent SDK, OpenAI Agents SDK, LangGraph, MCP, A2A, Langfuse, Agent Evals

Platform: GitHub Actions CI/CD, Docker, Kubernetes, Slurm, Prometheus/Grafana, Redis, PostgreSQL, Kafka

Cloud: AWS (EC2, S3, SQS, Lambda), GCP (Cloud Run), Azure, CoreWeave

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
