EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Found that a data pipeline was re-running completed work on every retry; built a distributed executor that routes jobs across Docker and AWS Lambda with an S3 artifact store, so finished work gets reused instead of recomputed.
- Built GPU/HPC cluster infrastructure in Go, scheduling jobs across Slurm and InfiniBand-networked nodes.
- Built a multi-agent system with the OpenAI Agents SDK and MCP tool-use for production workflows, with evaluation and guardrails around each agent step, handling millions of daily transactions at 99%+ uptime.
- Deployed a RAG pipeline on AWS SageMaker for real-time decision support at sub-200ms p99 latency, with an RTO under 2 minutes.
- Replaced polling with SSE for live metrics streaming, cutting redundant API calls 90%.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Traced a recall regression in a production RAG pipeline to its chunking strategy and rebuilt retrieval with hybrid dense-sparse search and re-ranking, raising recall from 61% to 89% on a 2K-query eval set.
- Built a model observability framework tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback workflows.
- Cut p99 serving latency from 420ms to 140ms across 50K+ daily requests by migrating synchronous serving to an async architecture with autoscaling.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Found that a nightly financial data-aggregation job was blocking downstream settlement; rewrote the SQL with indexed views and batch partitioning, cutting runtime from 8 minutes to 90 seconds.
- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, Go, Java, C++, TypeScript, SQL

Systems: Distributed Systems, Data Pipelines, Concurrency, Debugging, Data Structures & Algorithms

Data: PostgreSQL, SQL/Relational Databases, NoSQL, S3, Batch Processing, ETL

AI/Agentic: LLMs, RAG, Agentic Workflows with Evaluation & Guardrails, OpenAI Agents SDK, MCP

Cloud & DevOps: AWS (EC2, S3, RDS, SQS, Lambda, SageMaker), GCP (Cloud Run), Docker, Kubernetes, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
