Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Wrote infrastructure/systems-level code in Go, Rust, and C++ implementing job scheduling, resource allocation, and fault-tolerant placement for a shared cloud fleet, exposed via RESTful APIs.
- Operated multi-cloud infrastructure (AWS, GCP) on Kubernetes with CI/CD-automated deployment pipelines, coordinating distributed, event-driven microservices at scale.
- Designed stateful workload recovery via Redis checkpointing; interrupted distributed jobs resume from the last committed step, bolstering reliability under production load.
- Built observability tooling (metrics, logging, event-driven monitoring) for vigilant application-health monitoring and rapid fault diagnosis, replacing polling-based checks.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Migrated synchronous model serving to async, autoscaled infrastructure on Kubernetes, cutting p99 latency 420ms to 140ms across 50K+ daily requests while maintaining high availability.
- Operated cloud-native services with CI/CD-automated deployments, monitoring application health and diagnosing production issues across a multi-tenant environment.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and SQL-backed microservices in distributed systems for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Standardized REST API contracts (retry, timeout, propagation semantics) and OAuth-based authentication/RBAC across 25+ services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards across the team.

Projects

Distributed KV Store / VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus key-value store in C++ with leader election, log replication, and log compaction; companion VPC control plane simulator modeling subnet routing for fault-tolerant distributed coordination.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports, reducing mean time to resolution.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production LLM eval platform with hallucination detection, drift tracking, rubric-based scoring, and regression alerting across model versions; FastAPI backend, PostgreSQL.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Go, C++, Python, Rust, Java

Cloud & Infra: AWS, GCP, Kubernetes, Docker, CI/CD, Terraform

Backend & Security: RESTful APIs, Distributed Systems, Event-Driven Architecture, OAuth, RBAC, IAM

Reliability & Observability: Fault-Tolerant Scheduling, Metrics/Logging/Tracing, Kafka

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
