EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Delivered end-user-facing ML and Generative AI features at scale using PyTorch and TensorFlow with automated training workflows across millions of daily transactions.
- Designed and optimized Generative AI workflows across multiple LLMs (GPT, Claude, Llama, Gemini) for end-user-facing product features, tuning models per use case for output quality.
- Built a deployment-gated evaluation platform used across the engineering team, with rubric-based benchmarking and data-accuracy/quality-of-output checks that blocked 15% of regressions before release.
- Drove design and code reviews enforcing style and testability standards, and triaged production issues affecting service reliability.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Improved search/retrieval quality (recall 61% to 89%) on a 2K-query eval set by rebuilding the ranking pipeline with feature engineering, hybrid dense-sparse retrieval, and re-ranking.
- Built PySpark big-data processing jobs for large-scale feature engineering and dataset preparation feeding downstream model training and evaluation pipelines.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production Java microservices for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% via consistent retry, timeout, and propagation semantics.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- LangGraph agent decomposing multi-table questions into dependency-ordered SQL subqueries with intermediate result passing; deployable as an MCP-compatible server for enterprise data queries.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production eval platform with rubric-based scoring, drift detection, and latency tracking across model versions; FastAPI backend, PostgreSQL.

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, Java, SQL

ML/AI: PyTorch, TensorFlow, Generative AI, Information Retrieval, Ranking & Re-Ranking, Feature Engineering, LLMs

Data: PySpark (Big Data Processing), PostgreSQL

Cloud & Infra: AWS, GCP, Docker, Kubernetes

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
