EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Built a deployment-gated evaluation and performance-tooling platform (agent harness) used across the engineering team, with rubric-based benchmarking that blocked 15% of regressions before release.
- Built a multi-agent system via OpenAI Agents SDK and MCP tool-use handling millions of daily transactions at 99%+ uptime in production.
- Designed and optimized agentic AI workflows across multiple LLMs (GPT, Claude, Llama, Gemini), tuning models per use case for production quality and cost.
- Drove design and code reviews enforcing style and testability standards, and triaged production issues affecting service reliability.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built a model observability framework tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback workflows.
- Trained and deployed GPU-accelerated models in PyTorch, tuning inference for performance and memory efficiency under production load; cut p99 latency 420ms to 140ms via async serving with autoscaling.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% via consistent retry, timeout, and propagation semantics.

PROJECTS

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production eval platform with rubric-based scoring, drift detection, and latency tracking across model versions; FastAPI backend, PostgreSQL.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system (agent harness) automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, SQL, TypeScript

ML/Training & Inference: PyTorch, TensorFlow, Model Serving, Eval Frameworks, Agent Harnesses

Agentic AI: LLMs, LangChain, LangGraph, OpenAI Agents SDK, MCP, Tool-Use

Distributed Systems & DevOps: Distributed Systems, CI/CD, Docker, Kubernetes, AWS, GCP

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
