EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Designed and implemented end-to-end agentic systems across multiple LLMs (GPT, Claude, Llama, Gemini), making tradeoffs between latency, cost, and accuracy per use case.
- Built a multi-agent system via OpenAI Agents SDK and MCP tool-use with planning, structured outputs, and failure handling, handling millions of daily transactions at 99%+ uptime.
- Built a deployment-gated evaluation platform used across the engineering team, with rubric-based benchmarking that blocked 15% of regressions before release.
- Drove design and code reviews using LLM-assisted development tools, iterating quickly on complex agentic system components.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Improved RAG retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval and re-ranking, integrating retrieval as a tool within agentic workflows.
- Built a model observability framework tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback workflows.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% via consistent retry, timeout, and propagation semantics.

PROJECTS

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system that plans, calls tools, and executes multi-step incident-diagnosis workflows end to end; routes alerts to specialized sub-agents and synthesizes root cause reports.

LangFetch

tinyurl.com/LangFetch

- LangGraph agent integrating LLMs, tools, and data systems: decomposes multi-table questions into dependency-ordered SQL subqueries with intermediate result passing; deployable as an MCP-compatible server.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production eval and monitoring platform for agentic/LLM systems, with rubric-based scoring, drift detection, and latency tracking; FastAPI backend, PostgreSQL.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, TypeScript, SQL

Agentic Systems: LLMs, Agentic AI, Planning, Tool/Function Calling, Structured Outputs, Failure Handling, LangChain, LangGraph, OpenAI Agents SDK, MCP

Eval & Observability: LLM Evaluation, Model Observability, Drift/Latency Monitoring

Dev Tools & Infra: Claude Code / LLM-Assisted Development, AWS, GCP, Docker, Kubernetes

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
