EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Gathered requirements with **business stakeholders** and cross-functional teams and turned them into shipped **integrations** and **automated workflows**.
- Built **governance dashboards** tracking **model drift**, latency, and compliance metrics, and replaced polling with **SSE** streaming to cut redundant API calls **90%**.
- Integrated AI services with **enterprise systems** through typed **REST APIs** and **SQL**, secured with **OAuth** and **role-based access control (RBAC)**, and deployed on **AWS** and **Azure**.
- Automated **enterprise workflows** with **AI agents** and **prompt engineering** on OpenAI Agents SDK and MCP tool calling, removing manual steps across **millions of daily transactions**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built **Airflow** DAGs on **GCP** orchestrating multi-stage **ETL** pipelines with dependency management and **automated failure alerting**.
- Raised **top-3 retrieval recall** from **61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Built a model **observability** platform tracking drift, latency, and eval regressions, with **automated CI/CD rollback** that cut manual incident toil.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **Oracle SQL** and **PL/SQL** with indexed views and partitioning.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: SQL, PL/SQL, Python, Java, TypeScript

Data & Reporting: Oracle DB, PostgreSQL, Reporting Data Models, ETL, Airflow, Dashboards, Report Specifications

Application Support: Requirements Analysis, Business Process Documentation, Testing, Troubleshooting, Project Coordination

Platforms: AWS, GCP, Azure, REST APIs, Git, CI/CD, AI Workflow Automation

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
