EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Developed and deployed **deep learning models** in **PyTorch** and **TensorFlow** with automated training workflows and **MLOps CI/CD** on **AWS SageMaker**.
- Built a **responsible AI** evaluation framework scoring output quality, **hallucination rates**, and grounding, with **guardrails** and policy controls that **block failed releases** before production.
- Built **governance dashboards** tracking **model drift**, latency, and compliance metrics, and replaced polling with **SSE** streaming to cut redundant API calls **90%**.
- Automated **enterprise workflows** with **AI agents** and **prompt engineering** on OpenAI Agents SDK and MCP tool calling, removing manual steps across **millions of daily transactions**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Developed **PyTorch** deep learning models for **medical imaging** analysis and the **clinical data** workflows around them.
- Designed a **Neo4j knowledge graph** of clinical domain entities and relationships, deployed to production for graph-aware retrieval in a **regulated healthcare** product.
- Built a model **observability** platform tracking drift, latency, and eval regressions, with **automated CI/CD rollback** that cut manual incident toil.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Integrated **ML models** (**scikit-learn**, **TensorFlow**) into production workflows for **1M+ users** at **99.9% uptime**, with data pipelines processing **50K+ records** on AWS.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **Oracle SQL** and **PL/SQL** with indexed views and partitioning.
- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on AWS.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

PROJECTS

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

LangFetch

tinyurl.com/LangFetch

- LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Python, SQL, Java, TypeScript

ML & Analytics: PyTorch, TensorFlow, scikit-learn, pandas, NumPy, Predictive Modeling, NLP, Computer Vision

AI Operations: Model Monitoring, Drift Detection, Evals, Guardrails, Responsible AI, Workflow Automation, Dashboards

Cloud & Data: Azure, AWS SageMaker, GCP, PostgreSQL, Oracle DB, Airflow, PySpark, Healthcare AI

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
