EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Led a production **LLM** platform on **LangChain**, **LangGraph**, **OpenAI Agents SDK**, and **MCP** that automates **enterprise business workflows**, handling **millions of daily transactions** at **99%+ uptime**.
- Integrated AI services with **enterprise systems** through typed **REST APIs** and **SQL**, secured with **OAuth** and **role-based access control (RBAC)**, and deployed on **AWS** and **Azure**.
- Built a **responsible AI** evaluation framework scoring output quality, **hallucination rates**, and grounding, with **guardrails** and policy controls that **block failed releases** before production.
- Built **governance dashboards** tracking **model drift**, latency, and compliance metrics, and replaced polling with **SSE** streaming to cut redundant API calls **90%**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Raised **top-3 retrieval recall** from **61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Built **PySpark** jobs for large-scale dataset preparation feeding model training and **evaluation pipelines** in a regulated **healthcare** product.
- Designed a **Neo4j knowledge graph** of clinical domain entities and relationships, deployed to production for graph-aware retrieval in a **regulated healthcare** product.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **Oracle SQL** and **PL/SQL** with indexed views and partitioning.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

PROJECTS

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

LangFetch

tinyurl.com/LangFetch

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Python, SQL, PL/SQL, Java, TypeScript

AI & GenAI: LLMs, RAG, GraphRAG, LangChain, LangGraph, Hugging Face, OpenAI, Azure, AWS Bedrock, Prompt Engineering

Integration & Data: REST APIs, ETL, Airflow, PySpark, Oracle DB, PostgreSQL, Enterprise Systems Integration

Governance: Responsible AI, Model Evaluation, Guardrails, RBAC, Data Privacy, Monitoring

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
