EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Automated **enterprise workflows** with **AI agents** and **prompt engineering** on OpenAI Agents SDK and MCP tool calling, removing manual steps across **millions of daily transactions**.
- Built **governance dashboards** tracking **model drift**, latency, and compliance metrics, and replaced polling with **SSE** streaming to cut redundant API calls **90%**.
- Gathered requirements with **business stakeholders** and cross-functional teams and turned them into shipped **integrations** and **automated workflows**.
- Built a **responsible AI** evaluation framework scoring output quality, **hallucination rates**, and grounding, with **guardrails** and policy controls that **block failed releases** before production.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built **Airflow** DAGs on **GCP** orchestrating multi-stage **ETL** pipelines with dependency management and **automated failure alerting**.
- Raised **top-3 retrieval recall** from **61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Built a model **observability** platform tracking drift, latency, and eval regressions, with **automated CI/CD rollback** that cut manual incident toil.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **Oracle SQL and PL/SQL** with indexed views and partitioning.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Designed **SQL and NoSQL** data pipelines on **AWS SQS** with transformation and **data quality** checks, processing **50K+** records per run.
- Architected and operated **25+ production Python and Java microservices** for **1M+** users in financial services at **99.9% uptime** on **AWS**.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Python, SQL, PL/SQL, TypeScript, Java

Data & Reporting: Oracle DB, PostgreSQL, Data Modeling, ETL, Airflow, PySpark, Dashboards, Grafana

Automation & GenAI: AI Agents, Workflow Automation, Prompt Engineering, LLMs, RAG, OpenAI Agents SDK, LangGraph

Practices: Requirements Gathering, Documentation, Data Governance, Agile Scrum, Git, CI/CD

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
