EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Built **full-stack** web applications with **React/TypeScript** front ends, **Node.js** and Python back ends, and **SSE** live updates, shipped through **GitHub Actions CI/CD**.
- Secured web services with **OAuth** and **RBAC** behind typed **REST/JSON APIs**, with an S3-backed store at **sub-200ms p99**.
- Cut redundant API calls **90%** by replacing polling with **server-sent events**, improving page **performance** and real-time **observability**.
- Gathered requirements with **business stakeholders** and cross-functional teams and turned them into shipped **integrations** and **automated workflows**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.
- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Built a model **observability** platform tracking drift, latency, and eval regressions, with **automated CI/CD rollback** that cut manual incident toil.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and maintained **Java** and Python web services and **REST APIs** for **1M+ users** at **99.9% uptime**, with relational schema design.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **Oracle SQL and PL/SQL** with indexed views and partitioning.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- Full-stack app with a **TypeScript/Node.js** backend, **React** dashboard, and **PostgreSQL**; a LangGraph agent turns questions into dependency-ordered SQL via a typed **REST API**.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, PL/SQL, HTML/CSS

Web: React, Node.js, FastAPI, Spring Boot, REST, JSON, SSE, AJAX

Data: PostgreSQL, Oracle DB, MongoDB, Redis, Relational Schema Design

Tools: Git, GitHub Actions CI/CD, Docker, AWS, Agile, Technical Documentation

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
