Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Build backend services and REST APIs in Python, integrating agentic AI workflows (LangGraph, OpenAI Agents SDK) into production systems at 99%+ uptime.
- Own CI/CD pipelines, containerized deployment (Docker, Kubernetes), and Terraform-based infrastructure as code across the platform.
- Built a deployment-gated evaluation framework enforcing guardrails and observability, blocking 15% of failed releases before production.
- Build full-stack features (React/TypeScript, Python) partnering with product and business stakeholders, working in Agile sprints with Git-based version control.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built PySpark data processing jobs for large-scale feature/dataset preparation feeding downstream model training and evaluation pipelines.
- Built custom evaluators for RAG/agent workflows tracking drift, latency, and regression across model versions, catching failures before they reached production.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected 25+ production Java Spring Boot microservices exposing REST APIs, serving 1M+ users at 99.9% uptime on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards.

Projects

LangFetch | tinyurl.com/LangFetch

- Full-stack app with TypeScript/Node.js backend, React dashboard, and PostgreSQL; agent decomposes natural-language questions into dependency-ordered SQL subqueries via typed REST API.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production LLM eval platform with hallucination detection, drift tracking, rubric-based scoring, and regression alerting across model versions; FastAPI backend, PostgreSQL.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- Multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, Java, TypeScript, SQL, C++

Backend & APIs: Spring Boot, REST APIs, Microservices, FastAPI, PostgreSQL, Redis

DevOps: Docker, Kubernetes, Terraform, CI/CD, GitHub Actions

Agentic AI & Cloud: LangGraph, OpenAI Agents SDK, RAG, AWS, GCP

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
