Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Provisioned and operated multi-cloud **GPU clusters** (AWS, GCP, CoreWeave) with **NVIDIA/CUDA** and **InfiniBand**, running distributed training on **Slurm** and **Kubernetes**.
- Wrote **Go, Rust, and C++** systems code for **job scheduling**, resource allocation, and **fault-tolerant placement** of training workloads under real **GPU scarcity**.
- Built **agent evaluation harnesses** measuring output quality, **hallucination rates**, and grounding across agent versions, gating releases with **regression suites** and **A/B tests**.
- Built a **distributed executor** exposing typed **REST APIs** over Docker and serverless compute, backed by an **S3** artifact store at **sub-200ms p99**, with **OAuth/RBAC**.

QureAI | *AI Engineer* Mar 2026 – Present

- Extended **vLLM-class** serving internals with **CUDA/Triton** kernels, distributed **KV cache**, and **speculative decoding**, alongside **TensorRT-LLM**.
- Built an **RCA incident agent** that escalates to a **SQL agent over A2A**, with **Langfuse** tracing and evaluation on production agent runs.
- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Cut model-related production regressions **28%** and validation time from **6 hours to 90 minutes** with an automated **evaluation and deployment-gating** framework.
- Raised inference throughput **2.4x** and cut **GPU memory 27%** by profiling and optimizing batching, scheduling, and concurrency in **Python/C++** services.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.

Projects

Distributed KV Store `github.com/ganeshhgupta/distributed-kv-store`

- **Raft**-consensus key-value store with **linearizable reads** and **log compaction**, plus a companion VPC control plane simulator.

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Python, Go, Rust, C++, SQL, TypeScript

Distributed Systems: Kubernetes, Slurm, Docker, Raft, Kafka, Redis, PostgreSQL, REST APIs, Prometheus/Grafana

ML Infrastructure: PyTorch, Multi-GPU Training, vLLM, CUDA/Triton, KV Cache, Reinforcement Learning, Agent Evals, Langfuse

Cloud: AWS (EC2, S3, SQS, Lambda, SageMaker), GCP, CoreWeave, NVIDIA GPUs, InfiniBand, CI/CD

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
