EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned end-to-end AI-powered products: designed architecture, built **React/TypeScript** frontend and **Node.js/Python** backend, shipped to production with **GitHub Actions CI/CD**.
- Engineered pluggable **distributed executor** routing pipeline nodes to **Docker** or **AWS Lambda**, backed by **S3** artifact store eliminating redundant recomputation.
- Engineered cloud-native executor routing pipeline nodes to **Docker** containers and serverless functions via **REST APIs**, implementing **OAuth**-based auth and **RBAC** for secure service access.
- Replaced polling with **SSE** for live ML metrics streaming, cutting redundant API calls **90%** and enabling **real-time** governance dashboards.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut **p99 inference latency 420ms to 140ms** across **50K+ daily requests** migrating synchronous serving to async **vLLM** on **GCP Cloud Run** with autoscaling.
- Built **model observability** framework tracking **drift**, latency, and **eval regressions** in production, enabling governance-aligned **rollback** workflows.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Standardized **REST API** contracts across **25+ Java services** with consistent retry, timeout, and **OAuth**-aligned auth; reduced cross-service escalations **60%** within one quarter.
- Built and operated **25+ production microservices** in **C++** and SQL-backed **distributed systems** for **1M+ users**, sustaining **99.9% uptime** over 4 years on **AWS** (EC2, RDS, SQS).
- Standardized failure-handling contracts across **25+ financial services**, reducing production escalations **60%** in one quarter via consistent **retry, timeout, and propagation** semantics.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- LangGraph** agent decomposes multi-table questions into dependency-ordered **SQL subqueries** with intermediate result passing; deployable as **MCP-compatible** server.

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus** KV store with **linearizable reads** and **log compaction**; companion **VPC control plane** simulator modeling subnet routing and security groups.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph** multi-agent system diagnosing **production incidents** via tool-use chains; routes alerts to specialized sub-agents and synthesizes **root cause reports**, reducing **MTTR**.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, TypeScript, JavaScript, Java, Go, SQL, HTML/CSS

Full Stack: React, Node.js, FastAPI, REST APIs, GraphQL

Integrations: OAuth, Webhooks, Partner APIs, Payment and Transactional Systems

Infra: AWS, GCP, Docker, Kubernetes, PostgreSQL, Redis, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | GCP Professional MLOps Engineer
