Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Built a deployment-gated evaluation and developer-tooling platform used across the engineering team, with rubric-based benchmarking that blocked 15% of regressions before release.
- Designed and optimized agentic AI workflows across multiple LLMs (GPT, Claude, Llama, Gemini), building AI-native capabilities that help engineers plan and execute changes faster.
- Built a multi-agent system via OpenAI Agents SDK and MCP tool-use handling millions of daily transactions at 99%+ uptime.
- Engineered a pluggable distributed executor exposing typed REST APIs, routing pipeline nodes across Docker and AWS Lambda, backed by an S3 artifact store eliminating redundant recomputation.
- Drove design and code reviews enforcing style and testability standards, and triaged production issues affecting service reliability.

QureAI | *ML Infrastructure Engineer* Mar 2026 – Present

- Built a model observability framework tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback workflows.
- Cut p99 inference latency 420ms to 140ms across 50K+ daily requests by migrating synchronous serving to async vLLM on GCP Cloud Run with autoscaling.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java and Python with SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.
- Cut nightly financial data aggregation blocking downstream settlement from 8 minutes to 90 seconds by redesigning SQL with indexed views and batch partitioning.

Projects

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- LangGraph multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports, reducing manual toil for engineers.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- Production eval platform with rubric-based scoring, drift detection, and latency tracking across model versions; FastAPI backend, React/TypeScript dashboard, PostgreSQL.

LangFetch `tinyurl.com/LangFetch`

- LangGraph agent decomposing multi-table questions into dependency-ordered SQL subqueries with intermediate result passing; deployable as an MCP-compatible server for enterprise data queries.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Jul 2016 – Jul 2020

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL

Distributed Systems: Low-Latency Services, Object-Oriented Design, Microservices, REST APIs, Caching (Redis), Fault Tolerance, Event-Driven Pipelines

Operations: Metrics, Logging, Root Cause Analysis, Code Reviews, CI/CD, Docker, Kubernetes

AWS and Data: AWS (Lambda, S3, DynamoDB, API Gateway), PostgreSQL, Oracle PL/SQL, PySpark

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
