EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions, gating releases with **regression suites**.
- Built observability and autoscaling for **vLLM** inference serving with **Prometheus/Grafana**, and trained and fine-tuned **PyTorch** models on multi-GPU clusters.
- Built a **distributed executor** exposing typed **REST APIs** over Docker and serverless compute, backed by an **S3** artifact store at **sub-200ms p99**, with **OAuth/RBAC**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built **PySpark** jobs for large-scale dataset preparation feeding model training and **evaluation pipelines** in a regulated **healthcare** product.
- Raised **top-3 retrieval recall** from **61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Built a model **observability** platform tracking drift, latency, and eval regressions, with **automated CI/CD rollback** that cut manual incident toil.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Designed **SQL and NoSQL** data pipelines on **AWS SQS** with transformation and **data quality** checks, processing **50K+ records** per run.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

PROJECTS

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

LangFetch

tinyurl.com/LangFetch

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Python, Java, SQL, Go, TypeScript

Data Platform: PySpark, Kafka, Airflow, AWS SQS, ETL, Elasticsearch, PostgreSQL, Redis, Snowflake

ML & LLM Systems: Retrieval, Tool Use, Orchestration, Eval Harnesses, Guardrails, vLLM, PyTorch, Model Monitoring

Cloud & Delivery: Kubernetes, Docker, AWS, GCP, Azure, Terraform, CI/CD, Claude Code, Codex

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
