Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Build backend services and REST APIs (Java, Python) integrated with React frontends, deployed via GitHub Actions CI/CD at 99%+ uptime.
- Design scalable, distributed platform services with PostgreSQL and Redis, handling production traffic across multiple product teams.
- Built a deployment-gated evaluation framework enforcing guardrails and observability, blocking 15% of failed releases before production.
- Own code reviews, design discussions, and debugging in a fast-moving Agile environment with Git-based version control.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected 25+ production Java Spring Boot microservices exposing REST APIs for financial transaction processing, serving 1M+ users at 99.9% uptime on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly batch data processing, cutting runtime from 8 minutes to 90 seconds via indexed views and batch partitioning across relational and NoSQL data stores.
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ distributed services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built PySpark data processing jobs and batch pipelines for large-scale feature/dataset preparation feeding downstream model training and evaluation.

Projects

Distributed KV Store & VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a distributed key-value store in Go/C++ implementing Raft consensus, linearizable reads, and log compaction; simulated VPC control-plane semantics for network partition and leader-election testing.

LangFetch | tinyurl.com/LangFetch

- Full-stack app with TypeScript/Node.js backend, React dashboard, and PostgreSQL; agent decomposes natural-language questions into dependency-ordered SQL subqueries via typed REST API.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production evaluation platform with drift tracking, rubric-based scoring, and regression alerting across service versions; FastAPI backend, PostgreSQL.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Java, Python, TypeScript, SQL, C++, Go

Backend & APIs: Spring Boot, Spring MVC, REST APIs, Microservices, JUnit, Mockito

Data: PostgreSQL, Redis, NoSQL Databases, Batch Processing, Data Pipelines

DevOps & Cloud: AWS, GitHub Actions, CI/CD, Docker, React

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
