Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Developed and deployed **deep learning models** in **PyTorch** and **TensorFlow** with automated training workflows and **MLOps CI/CD** on **AWS SageMaker**.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions, gating releases with **regression suites**.
- Built **governance dashboards** tracking **model drift**, latency, and compliance metrics, and replaced polling with **SSE** streaming to cut redundant API calls **90%**.
- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.

QureAI | *ML Infrastructure Engineer* Mar 2026 – Present

- Developed **PyTorch** deep learning models for **medical imaging** analysis and the **clinical data** workflows around them.
- Designed a **Neo4j knowledge graph** of clinical domain entities and relationships, deployed to production for graph-aware retrieval in a **regulated healthcare** product.
- Built **PySpark** jobs for large-scale dataset preparation feeding model training and **evaluation pipelines** in a regulated **healthcare** product.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Integrated **ML models** (**scikit-learn, TensorFlow**) into production workflows for **1M+ users** at **99.9% uptime**, with data pipelines processing **50K+ records** on AWS.
- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **Oracle SQL and PL/SQL** with indexed views and partitioning.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.

Projects

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

LangFetch `tinyurl.com/LangFetch`

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Python, SQL, Java, TypeScript

ML: PyTorch, TensorFlow, scikit-learn, pandas, NumPy, Predictive Modeling, Computer Vision, NLP, LLMs, RAG

Healthcare & Data: Clinical Data Pipelines, Neo4j Knowledge Graphs, PySpark, Airflow, PostgreSQL, Oracle DB

MLOps: AWS SageMaker, GCP, Azure, Docker, Kubernetes, Model Monitoring, Drift Detection, CI/CD

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
