Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.
- Owned **full-stack** AI products end to end: **React/TypeScript** frontends and **Node.js**/Python backends, shipped through **GitHub Actions CI/CD** and handling millions of daily transactions.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions, gating releases with **regression suites**.
- Shipped **SSE-based streaming** agent delivery with **guardrails** and real-time **observability**, cutting redundant API calls **90%**.

QureAI | *ML Infrastructure Engineer* Mar 2026 – Present

- Built a **voice agent** for the agentic product surface, plus agent workflows on **AWS Bedrock** Agents, Knowledge Bases, and Guardrails.
- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

Projects

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

LangFetch `tinyurl.com/LangFetch`

- Full-stack app with a **TypeScript/Node.js** backend, **React** dashboard, and **PostgreSQL**; a LangGraph agent turns questions into dependency-ordered SQL via a typed **REST API**.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: TypeScript, Python, Java, SQL

Agents: Customer-Facing AI Agents, Voice Agents, Tool Calling, MCP, OpenAI Agents SDK, LangGraph, AWS Bedrock, Evals, Guardrails

Product: React, Node.js, FastAPI, REST APIs, SSE, Third-Party Integrations, PostgreSQL, Redis

Infra: AWS, GCP, Azure, Docker, Kubernetes, CI/CD, Observability

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
