EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Built and maintained **CI/CD pipelines** in **GitHub Actions** and **Jenkins** with automated build, test, and release stages, gating every release on **regression suites**.
- Owned **full-stack** AI products end to end: **React/TypeScript** frontends and **Node.js/Python** backends, shipped through **GitHub Actions CI/CD** and handling millions of daily transactions.
- Built a **distributed executor** exposing typed **REST APIs** over Docker and serverless compute, backed by an **S3** artifact store at **sub-200ms p99**, with **OAuth/RBAC**.
- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built a model **observability** platform tracking drift, latency, and eval regressions, with **automated CI/CD rollback** that cut manual incident toil.
- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.
- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated **25+ production Java Spring Boot microservices** exposing **REST APIs** for financial transaction processing, serving **1M+ users** at **99.9% uptime** on **AWS**.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **Oracle SQL and PL/SQL** with indexed views and partitioning.
- Raised code quality with **JUnit/Mockito** test suites, **object-oriented design** and common design patterns, and led **code reviews** and mentoring across the team.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- Full-stack app with a **TypeScript/Node.js** backend, **React** dashboard, and **PostgreSQL**; a LangGraph agent turns questions into dependency-ordered SQL via a typed **REST API**.

Distributed KV Store

github.com/ganeshhgupta/distributed-kv-store

- **Raft**-consensus key-value store with **linearizable reads** and **log compaction**, plus a companion VPC control plane simulator.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Java, Python, SQL, PL/SQL, JavaScript, HTML/CSS

Java Backend: Spring Boot, Spring MVC, REST Web Services, Microservices, JUnit, Mockito, Design Patterns

Data & Tools: Oracle DB, PostgreSQL, Jenkins, GitHub Actions, Git, CI/CD

Cloud & AI: AWS, Docker, Kubernetes, AI-Assisted Development (Claude Code, Codex), LLM Agents

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
