EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Built a **data ingestion** and execution layer exposing typed **REST APIs** over Docker and serverless compute, with an **S3** store at **sub-200ms p99**.
- Wrote **regression suites** and **automated tests** gating every release in **GitHub Actions CI/CD**, with **monitoring and alerting** on production jobs.
- Built **governance dashboards** tracking **model drift**, latency, and compliance metrics, and replaced polling with **SSE** streaming to cut redundant API calls **90%**.
- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built **PySpark** batch jobs and **Airflow** DAGs for large-scale data preparation, with **dependency management** and **automated failure alerting**.
- Built **PySpark** jobs for large-scale dataset preparation feeding model training and **evaluation pipelines** in a regulated **healthcare** product.
- Raised **top-3 retrieval recall** from **61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Designed **SQL and NoSQL** data pipelines on **AWS SQS** with transformation and **data quality** checks, processing **50K+** records per run.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **Oracle SQL and PL/SQL** with indexed views and partitioning.
- Architected and operated **25+ production Java Spring Boot microservices** exposing **REST APIs** for financial transaction processing, serving **1M+ users** at **99.9% uptime** on **AWS**.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

Distributed KV Store

github.com/ganeshhgupta/distributed-kv-store

- **Raft**-consensus key-value store with **linearizable reads** and **log compaction**, plus a companion VPC control plane simulator.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Python, Java, SQL, PL/SQL, Go

Data Platform: PySpark, Airflow, Kafka, AWS SQS, ETL, Snowflake, BigQuery, Redshift

Event-Driven Services: Spring Boot Microservices, REST APIs, Async Processing, Redis, PostgreSQL, DynamoDB

Delivery: Kubernetes, Docker, AWS, GCP, CI/CD, Monitoring, AI-Assisted Development (Claude Code, Codex)

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
