EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned **full-stack** AI products end to end: **React/TypeScript** frontends and **Node.js**/Python backends, shipped through **GitHub Actions CI/CD** and handling millions of daily transactions.
- Designed stateful **workflow recovery** with per-node **Redis checkpointing**, so interrupted long-running workflows **resume from the last committed step** with consistent state across distributed execution.
- Built a **distributed executor** exposing typed **REST APIs** over Docker and serverless compute, backed by an **S3** artifact store at **sub-200ms p99**, with **OAuth/RBAC**.
- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built a model **observability** platform tracking drift, latency, and eval regressions, with **automated CI/CD rollback** that cut manual incident toil.
- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.
- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse** retrieval and re-ranking.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated **25+ production Java Spring Boot microservices** exposing **REST APIs** for financial transaction processing, serving **1M+ users** at **99.9% uptime** on **AWS**.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- Full-stack app with a **TypeScript/Node.js** backend, **React** dashboard, and **PostgreSQL**; a LangGraph agent turns questions into dependency-ordered SQL via a typed **REST API**.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL

Full Stack: React, Spring Boot, Node.js, FastAPI, REST APIs, Event-Driven Integration, OAuth/RBAC

Workflow Reliability: Long-Running Workflows, Retries, Idempotency, Checkpointing, Redis, Kafka, AWS SQS

Delivery: CI/CD, Automated Testing, Observability, Prometheus/Grafana, Docker, Kubernetes, AWS, Claude Code, Codex

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
