EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Built GPU/HPC cluster infrastructure in Go and C++, scheduling jobs across Slurm and InfiniBand-networked nodes at large scale.
- Engineered a pluggable distributed executor routing pipeline nodes across Docker and AWS Lambda, backed by an S3 artifact store eliminating redundant recomputation.
- Built a multi-agent system with the OpenAI Agents SDK and MCP tool-use for production AI workloads, handling millions of daily transactions at 99%+ uptime.
- Owned backend services and APIs (Python/FastAPI) alongside this infrastructure, replacing polling with SSE for live metrics streaming and cutting redundant API calls 90%.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests by migrating synchronous serving to an async architecture with autoscaling.
- Built a model observability framework tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback workflows.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Built a Raft-consensus distributed storage engine in C++ from scratch, implementing log compaction and linearizable reads under concurrent writes; companion VPC control plane simulator modeling subnet routing.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production LLM evaluation and observability platform with rubric-based scoring and latency tracking across model versions; FastAPI backend, React/TypeScript dashboard, PostgreSQL.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: C++, Go, Python, Java, TypeScript, SQL

Systems: Distributed Systems, Large-Scale Infrastructure, Consensus Algorithms, Compute Scheduling (Slurm, InfiniBand)

AI: LLMs, Agentic AI, AI Workload Infrastructure, OpenAI Agents SDK, MCP

Cloud & DevOps: AWS (EC2, S3, SageMaker), GCP (Cloud Run), Docker, Kubernetes, CI/CD, PostgreSQL

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
