EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Built scalable ML services integrating LLMs into production systems, designing clean APIs and pipelines for agentic automation at 99%+ uptime.
- Deployed and operated services on Docker and AWS Lambda with an S3 artifact store, contributing to CI/CD and observability that keep them reliable.
- Built a deployment-gated evaluation framework enforcing guardrails and quality/regression checks across model outputs, blocking 15% of failed releases before production.
- Took an AI-native approach to engineering: used AI coding agents daily while owning the quality and correctness of what ships, human-written or agent-assisted.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Developed multi-modal computer vision models (PyTorch) for medical image understanding, with hands-on model training and fine-tuning on multi-GPU clusters.
- Built evaluation frameworks measuring model quality independently, designing test sets and choosing metrics to track drift, latency, and regression in production.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production Java microservices and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS.
- Standardized failure-handling contracts across 25+ services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production ML eval platform with rubric-based scoring, drift detection, and regression alerting across model versions; FastAPI backend, PostgreSQL, deployed on Kubernetes.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

LangFetch

tinyurl.com/LangFetch

- LangGraph agent decomposing multi-table questions into dependency-ordered SQL subqueries with intermediate result passing; deployed as an MCP-compatible API server.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, Java, TypeScript, C++, SQL

ML: PyTorch, LLMs, Computer Vision, Model Evaluation, Vision-Language Model Integration

Production Services: REST APIs, Docker, Kubernetes, CI/CD, Observability, System Design, Concurrency

AI Tooling: AI-Assisted Development, Agentic Automation, Prompt/Context Engineering

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
