Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Owned **full-stack** AI products end to end: **React/TypeScript** frontends and **Node.js**/Python backends, shipped through **GitHub Actions CI/CD** and handling millions of daily transactions.
- Built a document ingestion pipeline using **OCR (Tesseract)** to extract text from scanned documents into **structured data** that grounds **LLM** answers in a production RAG layer.
- Shipped **SSE-based streaming** agent delivery with **guardrails** and real-time **observability**, cutting redundant API calls **90%**.
- Built a **distributed executor** exposing typed **REST APIs** over Docker and serverless compute, backed by an **S3** artifact store at **sub-200ms p99**, with **OAuth/RBAC**.

QureAI | *AI Engineer* Mar 2026 – Present

- Designed **BigQuery schemas** and tuned analytical queries with **partition pruning and clustering**, and cut **p99 latency from 420ms to 140ms** on GCP Cloud Run.
- Implemented **GraphRAG** on a **Neo4j** knowledge graph for a regulated healthcare product, and agent workflows on **AWS Bedrock**.
- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **SQL and PL/SQL** on a financial RDBMS with indexed views and partitioning.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

Projects

LangFetch `tinyurl.com/LangFetch`

- Full-stack app with a **TypeScript/Node.js** backend, **React** dashboard, and **PostgreSQL**; a LangGraph agent turns questions into dependency-ordered SQL via a typed **REST API**.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: TypeScript, JavaScript, Python, SQL, Java, HTML/CSS

Full Stack: React, Node.js, FastAPI, REST APIs, SSE, PostgreSQL, Data Modeling, Redis

AI & LLMs: LLM Integration, OCR (Tesseract), RAG, LangGraph, OpenAI Agents SDK, MCP

Cloud & DevOps: AWS (IAM, RDS, EC2, S3, Lambda), Docker, Kubernetes, GitHub Actions CI/CD, Prometheus/Grafana

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
