EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Built a deployment-gated evaluation framework scoring model outputs against subjective, non-binary quality criteria, blocking 15% of failed releases before production where ground truth was ambiguous.
- Designed rubric-based scoring workflows translating fuzzy human judgment calls into structured, repeatable evaluation criteria across multiple model versions.
- Owned full-stack delivery of user-facing review and visualization tooling, React/TypeScript frontend through Python/FastAPI backend, at 99%+ uptime.
- Partnered with model teams to tune which quality signals to standardize on, iterating through ambiguity before criteria were well-defined.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Developed multi-modal computer vision models (PyTorch) for image understanding, training and fine-tuning on multi-GPU clusters with compression and quantization for efficient inference.
- Built a model observability framework surfacing drift and quality regressions in image outputs where standard metrics alone missed perceptual failures, feeding human-reviewed signal back into gating decisions.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Eval platform translating subjective quality judgments into rubric-based scoring and drift tracking across model versions; FastAPI backend, React/TypeScript dashboard, PostgreSQL.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C++, SQL

Computer Vision: PyTorch, Multi-Modal Image Understanding, Model Training & Fine-Tuning, Quantization

Evaluation & Quality: Rubric-Based Scoring, Subjective/Ambiguous-Criteria Evaluation, Observability, Drift Detection, Human-in-the-Loop Review

Front-End: React, HTML, CSS, Data Visualization

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, CI/CD, PostgreSQL

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
