Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Led a production **multi-agent** system on **LangGraph**, **LangChain**, **CrewAI**, and **MCP**, owning **agent orchestration**, tool use, and context design across **millions of daily transactions** at **99%+ uptime**.
- Built **tool-using agents** and planners on **OpenAI Agents SDK** and **MCP** that automate **enterprise workflows**, turning business requirements into shipped integrations.
- Built **evaluation harnesses** and **regression suites** that benchmark agent versions on hallucination, **grounding**, and safety, gating every release on measured results.
- Built **governance dashboards** tracking **model drift**, latency, and compliance metrics, and replaced polling with **SSE** streaming to cut redundant API calls **90%**.

QureAI | *ML Infrastructure Engineer* Mar 2026 – Present

- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Built **PySpark** jobs and **Airflow** DAGs for large-scale feature and dataset preparation feeding training and **evals**.
- Designed a **Neo4j knowledge graph** of clinical domain entities and relationships, deployed to production for graph-aware retrieval in a **regulated healthcare** product.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Integrated **ML models** (**scikit-learn, TensorFlow**) into production workflows for **1M+ users** at **99.9% uptime**, with data pipelines processing **50K+ records** on AWS.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **SQL and PL/SQL** on a financial RDBMS with indexed views and partitioning.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.

Projects

LangFetch `tinyurl.com/LangFetch`

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Python, SQL, PL/SQL, Java, TypeScript

GenAI & Agents: LLMs, Multi-Agent Systems, Tool-Using Agents, LangChain, LangGraph, OpenAI Agents SDK, MCP, AWS Bedrock

ML & Data: PyTorch, TensorFlow, scikit-learn, Fine-Tuning, Embeddings, Pinecone, FAISS, PySpark, Airflow

Cloud: AWS, GCP Vertex AI, Azure, Docker, Kubernetes, CI/CD

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
