Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Led a production **multi-agent** system on **LangGraph**, **LangChain**, **CrewAI**, and **MCP**, owning **agent orchestration**, tool use, and context design across **millions of daily transactions** at **99%+ uptime**.
- Trained and fine-tuned **PyTorch** models on multi-GPU clusters, and built **vLLM** serving with autoscaling and **Prometheus/Grafana** observability.
- Built **evaluation harnesses** and **regression suites** that benchmark agent versions on hallucination, **grounding**, and safety, gating every release on measured results.
- Implemented **GraphRAG** in production, improving grounding and accuracy over standard vector **RAG** on complex **multi-hop** questions.

QureAI | *ML Infrastructure Engineer* Mar 2026 – Present

- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Built **PySpark** jobs and **Airflow** DAGs for large-scale feature and dataset preparation feeding training and **evals**.
- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

Projects

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

LangFetch `tinyurl.com/LangFetch`

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Python, Rust, Go, Java, SQL, TypeScript

Agentic AI: LangGraph, LangChain, CrewAI, AutoGen, OpenAI Agents SDK, MCP, Agent Orchestration, Tool Calling, Context Engineering

ML & LLMs: PyTorch, TensorFlow, Fine-Tuning, NLP, RAG, Embeddings, Evals, vLLM

Platform: AWS, GCP, Azure, Docker, Kubernetes, Airflow, PySpark, CI/CD

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
