Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Technical anchor for the agentic AI platform, architecting multi-agent orchestration and tool-use reasoning using LangGraph, LangChain, and OpenAI Agents SDK with MCP tool integration at 99%+ uptime.
- Built event-driven agent workflows on AWS (API Gateway, Lambda, Step Functions, SQS) with IAM-scoped security boundaries, deployed into production AWS environments at sub-200ms latency.
- Built a deployment-gated evaluation pipeline instrumenting agent tracing, eval metrics, and cost/latency tradeoffs, enforcing guardrails and governance to block 15% of failed releases.
- Partner directly with product and business stakeholders to turn real problems into deployed AI solutions, translating between technical and non-technical audiences.
- Set engineering standards for CI/CD, testing, and secure development practices across the platform, working in Agile sprints with Git-based version control.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built production agents using AWS Bedrock Agents with Bedrock Knowledge Bases for managed RAG and Bedrock Guardrails for content-safety controls, deployed in a real AWS environment.
- Built a model observability and governance framework tracking drift, latency, and evaluation regressions in production, enabling monitored, auditable rollback workflows.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and SQL-backed microservices for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards.

Projects

LangFetch | tinyurl.com/LangFetch

- LangGraph agent compiling natural-language questions into dependency-ordered SQL subqueries with Pinecone vector retrieval and hybrid re-ranking; deployed as an MCP-compatible server for enterprise data queries.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports, reducing mean time to resolution.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production LLM eval platform with hallucination detection, drift tracking, rubric-based scoring, and regression alerting across model versions; FastAPI backend, PostgreSQL.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, SQL, Java, TypeScript, C++

AWS Bedrock & Agentic AI: Bedrock Agents, Bedrock Knowledge Bases, Bedrock Guardrails, LangGraph, LangChain, MCP, Agent Tracing & Eval Metrics

AWS Native: API Gateway, Lambda, Step Functions, SQS, IAM, Event-Driven Design

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Git, CI/CD

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
