Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Built and operated high-availability, fault-tolerant distributed systems on AWS (Lambda, DynamoDB, SageMaker) exposing REST APIs, sustaining 99%+ uptime under production load at sub-200ms p99 latency.
- Designed stateful recovery via Redis checkpointing; interrupted distributed workflows resume from the last committed step across fault-tolerant execution.
- Built a multi-agent backend system in Python integrating Anthropic Claude models (via AWS Bedrock) alongside GPT and Llama, with MCP tool-calling handling millions of daily transactions.
- Use Claude Code daily as an AI-assisted development tool for Python API design, debugging, and code review across the agentic AI platform.
- Built a document ingestion pipeline with OCR (Tesseract) extracting and converting text from scanned/image-based PDF documents feeding the retrieval and grounding layer.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built a model observability framework tracking drift, latency, and evaluation regressions in production, enabling governance-aligned rollback workflows as an early engineer at this AI startup.
- Improved RAG retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval and re-ranking.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and SQL-backed microservices in distributed systems for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Optimized SQL schema design and query performance, cutting nightly data aggregation from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ services, reducing production escalations 60% in one quarter.
- Applied OOP principles and design patterns to build testable, maintainable backend components, mentoring engineers through code reviews and design write-ups.

Projects

LangFetch | tinyurl.com/LangFetch

- LangGraph agent compiling natural-language questions into dependency-ordered SQL subqueries with Pinecone vector retrieval and hybrid re-ranking; deployed as an MCP-compatible server for enterprise data queries.

Distributed KV Store / VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus key-value store in C++ with leader election, log replication, and log compaction; companion VPC control plane simulator modeling subnet routing for fault-tolerant distributed coordination.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production LLM eval platform with hallucination detection, drift tracking, rubric-based scoring, and regression alerting across model versions; FastAPI backend, PostgreSQL.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, Java, C++, TypeScript, SQL

Claude & AI Tooling: Anthropic Claude (via AWS Bedrock), Claude Code, MCP, AI-Assisted Development

Backend & APIs: REST APIs, API Integration, Distributed Systems, Microservices, OCR/PDF Processing (Tesseract)

Cloud & DevOps: AWS (Lambda, EC2, RDS, SQS), Kubernetes, Docker, Git, CI/CD

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
