Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.
- Engineered a pluggable **distributed executor** with typed **REST APIs** and **GitHub Actions CI/CD**, with real-time **observability** across millions of daily transactions.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions, gating releases with **regression suites**.
- Shipped **SSE-based streaming** agent delivery with **guardrails** and real-time **observability**, cutting redundant API calls **90%**.

QureAI | *AI Engineer* Mar 2026 – Present

- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Implemented **GraphRAG** on a **Neo4j** knowledge graph for a regulated healthcare product, and agent workflows on **AWS Bedrock**.
- Built a **voice agent** for the agentic product surface, plus agent workflows on **AWS Bedrock** Agents, Knowledge Bases, and Guardrails.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime**.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **SQL and PL/SQL** on a financial RDBMS with indexed views and partitioning.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

Projects

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

LangFetch `tinyurl.com/LangFetch`

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Python, Java, TypeScript, SQL

Distributed Systems: Microservices, REST APIs, Event-Driven Systems, Kafka, SQS, Fault Tolerance, Observability, Scalability

Security: Secure API Design, OAuth, RBAC, Guardrails, Root-Cause Analysis, Regression Testing

AWS and Infra: Lambda, S3, EC2, ECS, DynamoDB, SQS, Docker, Kubernetes, GitHub Actions CI/CD

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
