Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Replaced polling with SSE for live ML metrics streaming, cutting redundant API calls 90% and enabling real-time monitoring dashboards used across the engineering team.
- Engineered a pluggable distributed executor exposing typed REST APIs, routing pipeline nodes across Docker and AWS Lambda, backed by an S3 artifact store eliminating redundant recomputation.
- Built a multi-agent system via OpenAI Agents SDK and MCP tool-use handling millions of daily transactions at 99%+ uptime.
- Drove design and code reviews enforcing style and testability standards, and triaged production issues affecting service reliability.

QureAI | *ML Infrastructure Engineer* Mar 2026 – Present

- Built a model observability framework tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback and maintenance workflows.
- Cut p99 inference latency 420ms to 140ms across 50K+ daily requests by migrating synchronous serving to async vLLM on GCP Cloud Run with autoscaling.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Architected and operated 25+ production microservices for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Cut nightly financial data aggregation blocking downstream settlement from 8 minutes to 90 seconds by redesigning SQL with indexed views and batch partitioning.
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

Projects

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- Production eval platform with rubric-based scoring, drift detection, and latency tracking across model versions; FastAPI backend, React/TypeScript dashboard, PostgreSQL.

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- LangGraph multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports, reducing manual toil.

Distributed KV Store / VPC Control Plane Simulator `github.com/ganeshhgupta/distributed-kv-store`

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Jul 2016 – Jul 2020

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL

Full Stack: React, TypeScript, REST APIs, FastAPI, Spring Boot, Microservices, Distributed Systems

Data: PostgreSQL, Oracle, DynamoDB, Redis, Kafka, SQS

AWS and Delivery: Lambda, S3, EC2, ECS, Docker, Kubernetes, GitHub Actions CI/CD

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
