Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Architected a deployment-gated safety and quality pipeline enforcing automated compliance, latency, and drift checks before every release, blocking 15% of releases that failed validation criteria from reaching production.
- Led design of a multi-agent orchestration system using the OpenAI Agents SDK and MCP tool-calling, with RAG-based retrieval over Pinecone, serving millions of daily transactions at 99%+ uptime and sub-200ms latency.
- Architected AWS serverless infrastructure (Lambda, S3, DynamoDB, API Gateway, SageMaker) for high-concurrency, real-time inference, optimizing cost and latency at production scale.

QureAI (AI Startup)

Jan 2024 – May 2025

ML Infrastructure Engineer

- Diagnosed a customer-facing model-quality gap directly from real user behavior signals, then owned the fix end-to-end: redesigned the retrieval pipeline, lifting recall 61% to 89% and cutting the underlying complaint pattern from 22% to 6% of sessions.
- Led migration of synchronous model serving to async vLLM with autoscaling, cutting p99 inference latency 420ms to 140ms across 50K+ daily requests through high-concurrency batching.

Nomura Research Institute Financial Technologies

Aug 2020 – Aug 2023

Software Engineer

- Architected and operated 25+ production Java microservices in distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly financial data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Mentored engineers and led standardization of failure-handling contracts across 25+ services in partnership with cross-functional teams, reducing production escalations 60% in one quarter through design and code reviews.

Projects

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production model-quality eval platform with rubric-based scoring, drift detection, and per-call latency tracking across model versions; FastAPI backend, React/TypeScript dashboard, PostgreSQL.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, Go, Java, TypeScript, SQL

ML Systems: Model Serving, RAG, Agent Orchestration (LangGraph, OpenAI Agents SDK, MCP), Vector Databases, vLLM

Backend & APIs: FastAPI, REST APIs, Microservices, PostgreSQL

MLOps & Cloud: AWS (Lambda, EC2, S3, RDS, SQS, SageMaker), GCP (Cloud Run), Docker, Kubernetes, CI/CD, Production ML Deployment

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
