EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Built and operate a multi-agent coding/tool-use platform via LangGraph, CrewAI, AutoGen, and the OpenAI Agents SDK, with MCP tool-calling and stateful agent memory via Redis checkpointing at 99%+ uptime.
- Designed and optimized agentic AI workflows across multiple LLMs (GPT, Claude, Llama, Gemini), selecting and tuning models per use case for production quality and cost.
- Built full-stack internal tooling using Node.js and React with AI-assisted development workflows, delivering mission-critical pipeline orchestration handling millions of daily transactions.
- Built a deployment-gated evaluation framework enforcing guardrails and quality/regression checks across agent outputs, blocking 15% of failed releases before production.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Improved RAG retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval over a vector store (Pinecone) and re-ranking.
- Built evaluation harnesses measuring LLM/agent output quality, drift, and regression across versions, catching failures before they reached production.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- LangGraph agent with MCP-compatible tool-use decomposing natural language into dependency-ordered SQL subqueries; TypeScript/Node.js backend with React dashboard and PostgreSQL.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production LLM/agent eval platform with rubric-based scoring, drift detection, and regression alerting across model versions; FastAPI backend, PostgreSQL.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, TypeScript, Java, C++, SQL

Agentic AI & LLMs: LangChain, LangGraph, CrewAI, AutoGen, OpenAI Agents SDK, MCP, RAG

Data: MongoDB, PostgreSQL, Vector Databases (Pinecone), Redis

Full-Stack & DevOps: React, Node.js, REST APIs, Docker, Kubernetes, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
