EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned end-to-end architecture for a full-stack internal platform: React/TypeScript frontend, Python/FastAPI backend, and REST APIs, independently turning ambiguous business requirements into shipped software at 99%+ uptime.
- Defined platform and service boundaries for a pluggable executor consumed by multiple internal teams, protecting data integrity and reliability while letting other teams extend workflows on top of it.
- Replaced polling with SSE for live metrics streaming, building a real-time data layer into the platform and cutting redundant API calls 90%.
- Partnered directly with business and engineering stakeholders to prioritize platform capabilities, including agentic workflow features (OpenAI Agents SDK, MCP tool-use) that surface useful next steps to end users.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Made architecture decisions for a production retrieval system handling sensitive data, improving recall 61% to 89% on a 2K-query eval set while maintaining data integrity guarantees.
- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests via an async redesign, balancing reliability and maintainability for a cross-team-consumed service.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production full-stack services for 1M+ users at 99.9% uptime over 4 years on AWS, partnering with enterprise business stakeholders to translate workflow requirements into technical designs.
- Standardized REST API contracts and failure-handling across 25+ services, reducing production escalations 60% while protecting data consistency across connected systems.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- Full-stack agent platform: React dashboard, Node.js/TypeScript backend, decomposing natural-language questions into dependency-ordered SQL subqueries via a typed REST API for enterprise data queries.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack observability platform with FastAPI backend, React/TypeScript frontend, and PostgreSQL, monitoring health and regressions across production deployments.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, TypeScript, Java, SQL, C++

Full-Stack: React, Node.js, FastAPI, REST APIs, SSE, Platform/API Design

Agentic Systems (plus, not required): OpenAI Agents SDK, MCP, LangGraph, RAG

Infra: AWS, GCP, Docker, Kubernetes, PostgreSQL, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
